Industrial Experience

Charlie Yan (Electrical and Computer Engineering). Summer 2022 – Spring 2023.
M.S. Thesis: Neural Schrödinger Bridge with Sinkhorn Losses.

Application Engineer intern at Onsemi: (September 2022-January 2023)

As an intern, I automated data collection for power integrated circuits using Python, LabView, and TestStand and enhanced data analysis methods. I developed scripts for processing large datasets and utilized APIs for result visualization online.

Electrical Engineer at SOKHT AMA co: (2016-2018)

As a Project Manager and Engineer, I led the reconstruction and automation of various Aluminum die-cast machines and their auxiliary equipment, enhancing operational efficiency. I oversaw the design and construction of performance test machines for the oil pump of TU5 engine Peugeot cars manufactured by Iran Khodro.co, ensuring accurate and efficient testing protocols. My role encompassed end-to-end project management, from conceptualization and design to implementation and testing, driving process optimizations and automation.
